

Fully Automatic Satellite TV System

SatKing
PRO MAX

Are you looking for a Fully Automatic Satellite TV System that is easy to install and very easy to use?

The SatKing Pro Max is the most advanced Motorised Satellite TV System on the market. The flat panel design is compact and offers big performance. This motorised satellite system has a dual output LNB as standard and is suited for VAST, Foxtel, Foxtel IQ and Austar. The unit is already high definition MPEG4 so as TV networks change to MPEG4 HD the Pro Max will have no issue's, many automatic dishes currently on the market are MPEG2 and in the future will stop working.

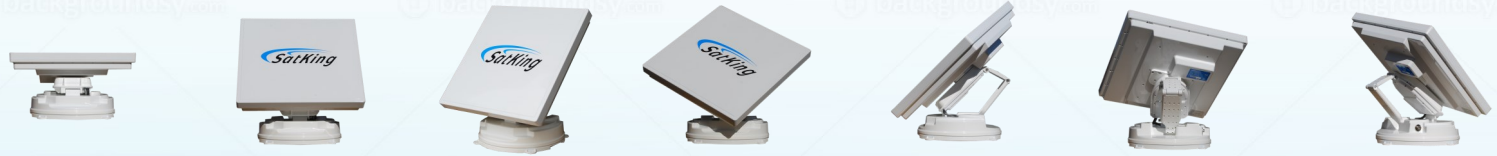

All components for the installation are included in the package and the Pro Max requires a very small amount of roof space on the van, no more compromises with solar panels and other competing products

The SatKing Pro Max is user friendly, simply select your preferred satellite and press OK and the satellite system adjusts automatically for you. Locking the signal is very fast and with last position memory, your next set up will be even quicker. The unit is made in Korea from first class components.

The SatKing Pro Max has a built in 24 channel GPS system, setting a new standard for signal location. The flat panel design offers higher signal gain than equivalent size offset satellite TV dishes. Providing coverage for Vast and Foxtel across almost all of Australia.

The SatKing Pro Max is made for the harsh Australian conditions, the unit is backed with a 3 year Australian warranty and technical support via the SatKing 1300 help line.

SatKing PRO MAX Automatic Satellite TV System

Signal Locked Within 80 Seconds!

The SatKing ProMax Fully Automatic Motorised Satellite TV system is the most advanced satellite TV system on the market. The unit suits both Foxtel and VAST satellite TV, just plug in your existing satellite receiver or purchase one of our new SatKing VAST receivers to get going.

Using the latest GPS technology, sit back, relax and within 80 seconds you will be watching live TV. No more manually aligning your old dish or putting up with poor local TV reception. The flat panel design uses half the roof space of all the conventional motorised dishes on the market, saving space for other products. The Pro Max is also great value, no longer do you have to pay \$5,500+ for a top quality automatic system.
